### Algorithms In Java Sedgewick Solutions

Solutions to the exercises of the Algorithms book by Robert Sedgewick and Kevin Wayne (4th editon). I found the book to be an excellent resource to learning algorithms and data structures. Since there are not many (almost none) solutions of the exercises on the Internet and the only ones available are incomplete, I decided to share my work on the exercises.

Sort algorithms are ordering the elements of a list according to a certain order. For the Java examples I will assume that we are sorting an array of integers. The examples for this chapter will be created in a Java project "de.vogella.algorithms.sort". The sorting algorithm will implement the following interface.

This booksite supplements the forthcoming textbook Introduction to Computer Science in Java by Robert Sedgewick and Kevin Wayne. Textbook. Our book is an interdisciplinary approach to the traditional CS1 curriculum. We teach all of the classic elements of programming, using an "objects-in-the-middle" approach that emphasizes data abstraction.

Algorithms in Java Book Description: This edition of Robert Sedgewick's popular work provides current and comprehensive coverage of important algorithms for Java programmers. Michael Schidlowsky and Sedgewick have developed new Java implementations that both express the methods in a concise and direct manner and provide programmers with the practical means to test them on real applications.
