audi a4: timing belt..3.0,with out the cam locking tool..cams spun I pulled the timing belt off my audi a4 3.0,with out the cam locking tool,and the cams spun on me,I did however Index the cams in relation to one another,with a sharpie,so if i just line up my marks sh ...

2004 Audi 3.0....I replaced the timing belt with out the ...

The 3.0L 30 valve V6 engine is driven by a timing belt system which links the cylinder heads, camshafts, and crankshaft to run in sync. This Audi timing belt system consists of a wear resistant, high strength, corded/molded rubber timing belt (a.k.a. Audi toothed belt).

Audi A4 A6 Timing Belt Replacement Info 3.0L 30V

What is the timing procedure for a 2003 Audi A6 Quattro 3.0 there is a special tool as there are no timing marks, in front of the cam gears are plates with two holes in each (for location of tool) there is also a tool that protrudes into the crankshaft position sensor hole.. if you dont have access to the specialty tools , than i would engrave marks on the gears and covers to align to original positions.

SOLVED: Timing marks for a 2003 audi a6 quattro 3.0 - Fixya

All the 3.0 TDI engines are cam chains that are designed to last the life of the car. I don't think there is a recommended change interval. They live at the back of the engine so replacement is an engine out job and is not cheap. Typically they seem to be good for 180-200K miles.

i have 2002 audi a6 quattro 3.0 L my question is - timing belt broke due to bad water pump.(crank TDC is lost) i have bought the necessary speciality tools- cam lock tool kit to service or replace water pump. i lock the cams using cam lock tool.-But where is the Correct Crank Shaft Position. i noticed there two groove points on the crank shaft gear. do i point em up like a "V"?? or do i have ...

I have 2002 audi a6 quattro 3.0 L my question is - timing ...

I did few timing belt jobs on older V6 motors and never used it and my buddy Russ (Audi tech) approved that as well, as long as you don't move your crankshaft once the belt is off. So, once you break all 4 cam bolts lose you can then compress the timing belt tensioner. to do so, you will need a 8mm allen socket. you will insert the socket like this:
