EXFO Inc. | Photonics Buyers' Guide

Exfo Photonic Solutions Inc. has launched a handheld radiometer that can measure up to 225,000 mW/cm 2 of optical energy in the 250- to 600-nm band. Suitable for use with UV/VIS spot curing systems, the device also measures power or radiance, making it useful with illumination and nondestructive testing systems.

Meeting the Challenges of Photonic Integrated Circuit (PIC) testing for next-generation networks Three industry innovators – EXFO, Hewlett Packard Enterprise (HPE) and MPI Corporation – have combined forces to address the challenges posed by optical component testing with faster and more reliable measurement techniques.

Photonic integrated circuits | PIC testing challenges | EXFO

You're under increasing pressure to develop and launch high-quality products and ramp up production lines. Choosing EXFO's solutions for lab and manufacturing testing can help you innovate, develop, troubleshoot and deliver more, better and faster.

Lab and manufacturing testing solutions | EXFO

Often compared to the groundbreaking electronic processor, photonic integrated circuits (PIC) are similarly imprinted onto wafers before being cut into individual chips. The PIC can combine many functions: purely optical as well as opto-electrical, electro-optical or fully electronic, hence offering the best of optics and electronics.
