Gender Environment And Sustainable Development

For sustainable development to become a reality, it is incumbent on policymakers to envision growth strategies that recognise and respond to the gender-based realities in the sphere of managing the environment and natural resources. Gender, the Environment and Sustainable Development in Asia and the Pacific is the first Asia-Pacific report that

Gender, the Environment and Sustainable Development in ...

A gender gap is a gender-based inequality; it is any disparity in treatment or situation between women and men, often rooted in social, cultural and legal norms and customs. Gender gaps create barriers to effective sustainable development and livelihoods by limiting or restricting women's access to resources and decision-making opportunities.

Gender, environment and sustainable development: understanding the linkages The accelerating degradation of the living environment is the latest and, in many ways, the most dangerous of the threats women face. (Dankelman and Davidson 1988) Do gender, environment and sustainable development have any specific relationships?

Gender, environment and sustainable development ...

Gender equality is currently focusing especially on the workplace. The report, 'Turning Promises into Action: Gender Equality in the 2030 Agenda for Sustainable Development', published recently by UN Women, focuses on achieving the Sustainable Development Goals (SDGs) from a gender perspective, in which women assume a special role.

Gender equality and sustainable development

Mounting evidence shows that advancements in gender equality could have a profoundly positive impact on social and environmental well-being. But if not managed properly, environment projects can actually spur gender inequality. It's a connection that anyone working in the environment and sustainable development space must keep in mind.
