The first step is to go to make sure you're logged into your Google Account and go to Google Books at books.google.com.

### Information On Abortions For A

Medical abortion is a procedure that uses medication to end a pregnancy. A medical abortion doesn't require surgery or anesthesia and can be started either in a medical office or at home with follow-up visits to your doctor. It's safer and most effective during the first trimester of pregnancy.

### Medical abortion - Mayo Clinic

It is a basic healthcare need for millions of women, girls and others who can become pregnant. Worldwide, an estimated 1 in 4 pregnancies end in an abortion every year. But while the need for abortion is common, access to safe and legal abortion services is far from guaranteed for those who may need abortion services.

### Key facts on abortion | Amnesty International

Unless there's a rare and serious complication that's not treated, there's no risk to your ability to have children in the future or to your overall health. Having an abortion doesn't increase your risk for breast cancer, and it doesn't cause depression or mental health issues. Abortions don't cause infertility either.

### What facts about abortion do I need to know?

Abortion is safer for the mother than carrying a pregnancy to term. Medical and surgical abortions are both safe and effective when performed by trained practitioners. Most women seeking abortion are white (53%); 36% are black, 8% are of another race, and 3% are of unknown race. Abortion rates are highest among 20- to 24-year-old women.
