### How and Why Planes Have to Fly So High | Time

Background. On the evening of July 16, 1999, John F. Kennedy Jr. piloted a Piper Saratoga to attend the wedding of his cousin, Rory, to Mark Bailey at the Kennedy Compound in Hyannis Port, Massachusetts. The plane also carried Kennedy's wife, Carolyn Bessette, and sister-in-law, Lauren Bessette. Lauren Bessette was to be dropped off at Martha's Vineyard Airport, while Kennedy and his wife would ...

### John F. Kennedy Jr. plane crash - Wikipedia

Lift and drag vary with the square of your speed, so if a plane goes twice as fast, relative to the oncoming air, its wings produce four times as much lift (and drag). Helicopters produce a huge amount of lift by spinning their rotor blades (essentially thin wings that spin in a circle) very quickly.

**How planes work | the science of flight - Explain that Stuff**

“When plane spotters post photos of the various international carriers, they assist in delivering a message that you can go anywhere from Dulles International Airport,” she said. Recognizing the value that the spotters add to the airport, the Dulles staff have found ways to cater to the aviation enthusiasts and give back in a way.
