### Radicals Rational Exponents Answer Key

Given an expression with a rational exponent, write the expression as a radical. Determine the power by looking at the numerator of the exponent. Determine the root by looking at the denominator of the exponent. Using the base as the radicand, raise the radicand to the power and use the root as the index.

### Radicals and Rational Exponents - Algebra and Trigonometry

Well, one, we could use an exponent property here, or I guess we could call it a radical property, that if I have the square root of a times the square root of b, that's going to be equal to the square root of a times b. So in this case, a would be 0.4 and b would be 1.25, so this is going to be the same thing as the square root of 0.4 times 1.25.
